

Done right, Every time!

IT IS DONE – Move-out Cleaning (Standard Checklist)

Latest update: 26.02.2026

Standard checklist for empty homes. If your landlord/housing association has extra requirements, you must provide them in writing before we start so they can be added to the scope.

Conditions and customer responsibilities

- The property must be emptied before we arrive (including cupboards, drawers, storage rooms, fridge/freezer).
- All personal items, waste, and bulky items must be removed (we do not provide disposal unless agreed).
- Water and electricity must be available.
- We clean only areas that are safe and accessible. We pull forward the freestanding stove/oven and fridge (when possible) to clean behind/under. Built-in appliances and very heavy items are not moved unless agreed in advance.
- If something cannot be cleaned due to damage, permanent discoloration, or wear, we will note it.
- Waste removal/transport and extreme conditions (heavy mold, pests, smoke/soot, post-construction heavy cleaning) are not included unless agreed.
- High-level exterior windows (above safe reach) are only cleaned by agreement.

Included in the standard move-out cleaning

All rooms

- Dusting/wiping of reachable surfaces (tables, shelves, ledges).
- Wipe skirting boards, door frames, doors and handles.
- Wipe reachable light switches and sockets (surface only).
- Clean reachable radiators (front and visible areas).
- Vacuum all floors (including corners) and wet-mop as appropriate for the floor type.

Kitchen

- Clean all cupboard and drawer fronts; clean inside cupboards/drawers (empty).
- Degrease and wipe countertops, backsplash and sinks; polish taps.
- Oven and hob/ceramic top cleaned (inside/outside) to remove grease and residue (standard level).
- Freestanding stove/oven pulled forward and cleaned behind/under (when safe to do so).
- Extractor hood wiped; filter cleaned (where removable and accessible).
- Fridge/freezer cleaned (inside/outside) – must be emptied and defrosted before arrival unless otherwise agreed.
- Freestanding fridge pulled forward and cleaned behind/under (when safe to do so).
- Dishwasher: clean filter and door edges (if present).

Bathroom

- Descale and clean shower area, tiles (reachable), taps and fittings (standard limescale level).
- Clean toilet (inside/out), sink, mirror and reachable surfaces.
- Clean floor and visible drain cover (where accessible without tools).

Windows

- Inside window cleaning (glass) including frames and rebates (falsar) where reachable.
- Apartment outside windows: outside windows are cleaned only where safe and reachable – typically up to 1st floor using a long scraper. Above 1st floor only by agreement.
- If apartment windows can open inward / be turned, the outside surface can be cleaned from inside where reachable.

Limitations and prerequisites

- We clean accessible areas and do not dismantle fixed installations. We typically pull out a freestanding stove/oven and a freestanding fridge to clean behind and underneath, if it can be done safely. Built-in appliances and very heavy items are only moved by prior agreement.
- Excessive dirt/heavy limescale, mould, pests, or strong odours must be assessed and may require additional services.
- Any special landlord/association requirements (e.g., built-in appliances, high ceilings, balcony/drains, basement/storage rooms, etc.) must be provided in writing before we start.
- Safety first: exterior work at height is only performed with safe access and by agreement. We finish with a visible quality check.

Want us to do it for you?

In a hurry? We can take care of everything for you—so you avoid issues at inspection / handover.

Why choose IT IS DONE for your move-out cleaning:

- Fixed-price quote based on your home and requirements
